PROFESSIONAL SUMMARY

Motivated and detail-oriented computer science student with a **CGPA of 3.61**, passionate about web development and problem-solving. Skilled in **frontend development (HTML, CSS, JavaScript)** and familiar with **Node.js** and **Laravel** basics. Strong ability to build and manage responsive projects independently or as part of a team. Eager to learn, innovate, and contribute to impactful projects.

SKILLS

- Frontend Development
- Backend Fundamentals
- Version Control(Git and GitHub)
- Problem Solving
- Adaptability

PROJECTS AND EXPERIENCE

Frontend Developer | Independent Projects

- Website Development:** Designed and implemented responsive and interactive websites using HTML, CSS, and JavaScript.
- Portfolio Project:** Created personal portfolio showcasing skills and project work.
- User Experience (UX):** Focused on crafting intuitive and visually appealing user interfaces.

Backend Exploration | Self-Learning Initiatives

- Gained practical experience with **Node.js** and **Laravel**, understanding server-side scripting and database integration.
- Built and deployed small-scale projects on GitHub integrating frontend and backend functionalities.

Collaborative Projects

- Worked on group projects during coursework, developing modular and maintainable frontend components.
- Participated in debugging and code optimization tasks to ensure project efficiency.

EDUCATION

Bachelor of Science in Computer Science

Major:Computer Science

Current GPA

3.61

National University of Modern Languages

Feb, 2023 - Present

TOOLS AND TECHNOLOGIES

Frontend:

HTML, CSS, JavaScript

Backend Basics:

Node.js, Laravel

Version Control:

Git, GitHub

Design Tools:

Canva (basic knowledge)

Database

MySQL, MongoDB (basic knowledge)

COURSES

- Responsive Web Development , Backend Development with Node.js - [Udemy]
- Git and GitHub Essentials – [Udemy]

EXTRACURRICULAR ACTIVITIES

- Open-Source Contributions: Actively contribute to GitHub projects, collaborating with developers worldwide.
- University Coding Club Member: Participate in hackathons and coding challenges to solve real-world problems.
- Online Courses: Regularly enroll in tech courses to stay updated with industry trends.

INTERESTS

- Web Development and Full-Stack Programming
- Learning and Implementing Emerging Technologies
- Problem Solving through Software Development

GOALS

Seeking an opportunity in a dynamic software house to apply my technical expertise and grow as a full-stack developer, contributing to innovative and impactful projects.
